

VITALERTER™ Care Monitoring platform integrates a new application allowing care providers to digitally record residents' care routines and activities - saving precious time on paperwork, improving staff efficiency and quality of care.

Notifications and reminders are displayed in real-time on mobile devices and monitoring screens.

All reports and records can be accessible for analysis.

Thanks to its intuitive user interface, teams can easily set activities plan individually for each resident.

Main Benefits of using VITALERTER™ digital care activities

- Help staff to manage their time, daily activities and provide efficient patient care
- Provide accurate information at the point of care
- Better coordination and communication between staff members
- Save time and related cost for the care team
- Engage care teams reducing the workload
- Enhance resident's safety and quality care
- Increase transparency for managers, inspectors and satisfaction for families
- Analytic reports for the facility managers

Improved Safety - Minimized Errors - Increased Transparency
